

Chapter 3.1 - 3.1

www.CrosswordWeaver.com

ACROSS

- 1 Methane and other compounds composed of only carbon and hydrogen.
- 3 Carbon Based Molecules
- 7 Hydrogen atom bonded to an oxygen atom (OH)
- 8 Compounds with the same formula but different structure.
- 10 Nitrogen atom bonded to two hydrogen atoms.
- 11 Links monomers together to form polymers.
- 12 Small organic molecules bonded into chains.
- 14 The chain of carbon atoms in an organic molecule.
- 15 The groups of atoms that usually participate in chemical reactions.
- 16 Phosphorus atom bonded to four oxygen atoms.

DOWN

- 2 A carbon atom linked two double bonded oxygen atom.
- 4 Compounds that contain carboxyl groups.
- 5 Addition of water; digestion of polymers into their monomer
- 6 Water fearing
- 7 Water loving.
- 9 Large biological molecules.
- 13 The units that serve as the building blocks of polymers.
